**DAY SAIL PROGRAM  
DISCLOSURE OF RISKS  
TRAINEES UNDER AGE 19**

**PRINTED NAME OF TRAINEE:** \_\_\_\_\_

*“The trouble with adventures,” grumbles Tolkien’s hobbit, “is that they make you late for dinner.”*  
Adventures also involve risks that parents and trainees should be aware of.

These 3 pages must be read by both the Trainee and a Parent/Guardian whose signature must be **witnessed** by an individual 19 years of age or older. **This form must be submitted to SALTS prior to boarding the vessel.**

**DISCLOSURE OF RISKS:** The day sail you are about to take is a sail training program which will occur in the waters and shores of British Columbia, beginning and ending in Victoria. It is important that you understand the implications of travel aboard ship to remote locations and the risks of participating in a sail training program.

As a Trainee on a SALTS sail training vessel you will be involved in most aspects of sailing the ship while under the authority of the Master of the vessel and the professional and volunteer crew. Trainees will be organized into watches and assigned rotating duties: forward watch, stern watch, helm watch, radio watch and night watch.

Trainees must be physically agile and alert. The risks associated with sailing on a SALTS vessel include, but are not limited to:

- Accident or illness without easy access to medical facilities
- Moving about on slippery decks during erratic, heaving motions of the ship
- Special risks of bodily injury from the ship’s gear, running rigging, and spars which may be unique to our program, requiring a certain level of active involvement and alertness on the part of each trainee
- Navigating the ship’s eight-foot-high companionway ladders while the ship is in motion
- Launching and rowing dories involves the risk of fall to the boat, dock or ocean while climbing over the side of the ship to board or disembark the dory
- Climbing aloft in the rigging (masts range from 75 to 115 feet) and climbing out on the bowsprit expose you specifically to the risk of falling to the deck or falling into the ocean
- The specific risk of drowning or being exposed to hypothermia by falling overboard while the ship is at anchor or underway
- Risks and dangers that occur when exposed to the forces of nature including unpredictable weather and waves

SALTS seeks to provide the safest environment possible. Our ships receive an annual Certificate of Inspection from Transport Canada and crew-members receive First Aid training. Safety equipment such as PFD’s, safety lines, strobe lights, and climbing harnesses are used when deemed necessary by the crew. SALTS has been in operation since 1974, and although it has an excellent safety record, it is important that each Trainee understand the risks inherent in the Trip and voluntarily assume these risks.
